

3/2 пневмораспределитель с электропневматическим управлением VP300/500/700

G1/8 ~ G1/2

- Высокая пропускная способность
- Ресурс более 50 млн. циклов
- Низкая потребляемая мощность: 1.5 Вт (0.75 Вт у исполнения с энергосберегающей схемой)
- Возможно применение для вакуума до -101.2 кПа (в исполнении с внешним пилотным управлением)
- Легкое переключение с Н.О. на Н.З. и обратно

Технические характеристики

| | | | | | |
|-----------------------------------|-----------------------------------|---------------------------------|---|------------------------------|---|
| Среда | | | Очищенный сжатый воздух с содержанием масла или без него. | | |
| Тип управления | | | Внутреннее пилотное управление | Внешнее пилотное управление | |
| Рабочий диапазон (МПа) | Исполнение на пониженное давление | | 0.2 ~ 0.7 | Давление на входе -0.1 ~ 0.7 | Давление пилотного воздуха такое же, как давление на входе, но не менее 0.2 |
| | Стандарт | | 0.2 ~ 1.0 | Давление на входе -0.1 ~ 1.0 | |
| Диапазон рабочих температур (°C) | | | -10 ~ 50 | | |
| Время срабатывания (мс) | | | < 47 | | |
| Макс. частота срабатывания (Гц) | | | 5 | | |
| Вспомогательное ручное управление | | | Блокируется | | |
| Монтажное положение | | | Произвольное | | |
| Электрический подвод | | | DIN-разъем | | |
| Напряжение* (В) | DC | | 24 | | |
| | AC | | 220 | | |
| Допуск по напряжению | | | ±10% | | |
| Потребл. мощность | DC (Вт) | Стандарт | 1.5 (1.75 с индикацией рабочего состояния) | | |
| | | Энергосберегающая схема (опция) | 0.75 с индикацией рабочего состояния | | |
| | AC (В·А) | | 1.5 (1.7 с индикацией рабочего состояния) | | |
| Степень защиты | | | IP65 | | |
| Класс изоляции | | | В | | |
| Искрогашение | | | По запросу (см. ответные части разъема) | | |
| Индикатор рабочего состояния | | | По запросу (см. ответные части разъема) | | |

* Другие напряжения по запросу

3 Port Solenoid Valve

Reduced power consumption:

0.55 W

[With power saving circuit]

1.55 W

[Standard]

(Conventional: 2.0 W) * With DC light

Power consumption reduced by power saving circuit.

Power consumption is decreased by approx. 1/3 by reducing the wattage required to hold the valve in an energized state. (effective energizing time is over 40 ms at 24 VDC.) Refer to electrical power waveform as shown below.

Electrical power waveform of energy saving type

Series VP300

Built-in full-wave rectifier (AC)

Noise reduction

Noise is considerably reduced by changing it to DC mode via a full-wave rectifier.

Reduced apparent power

Conventional: 5.6 VA → **1.55 VA**

Longer life expectancy: 50 million cycles or more

(Conventional: 20 million cycles) * Based on SMC test conditions

Built-in strainer in the pilot valve

Unexpected troubles due to foreign matter can be prevented.

Note) Be sure to mount an air filter on the inlet side.

Rubber material: HNBR
Ozone-resistant specification

* The pilot valve poppet is made of FKM.

Strainer

Air Operated Valve

Series **VPA300/500/700**

Series **VP300/500/700**

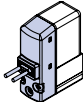

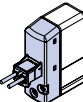

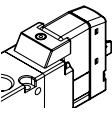

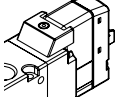

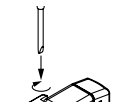

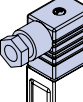

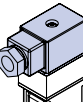

RoHS compliant

CAT.EUS11-97A-UK

| 04 | 1/2 | — | — | ○ |

Made to Order

| | |
|------|--|
| — | — |
| X500 | Pilot exhaust port with piping thread (M3) specification (Refer to page 24). |

Electrical entry

| Grommet | L-type plug connector | M-type plug connector | DIN terminal | DIN (EN175301-803) terminal | Conduit terminal |
|---|-----------------------------------|-----------------------------------|-----------------------|-----------------------------|---------------------|
| | | | | | |
| G: Lead wire length 300 mm H: Lead wire length 600 mm | L: With lead wire (length 300 mm) | M: With lead wire (length 300 mm) | D: With connector | Y: With connector | T: Conduit terminal |
| | | | | | |
| G: Lead wire length 300 mm H: Lead wire length 600 mm DC Without light/surge voltage suppressor | LN: Without lead wire | MN: Without lead wire | DO: Without connector | YO: Without connector | |

Note 1) LN and MN types are with 2 sockets.

Note 2) Refer to back page 4 when different length of lead wire for L/M-type plug connector is required.

Note 3) Refer to back page 5 for details on the DIN (EN175301-803) terminal.

Note 4) The AC mode of G, H, L and M types are not CE compliant.

Manual override

| —: Non-locking push type | D: Push-turn locking slotted type | E: Push-turn locking lever type |
|--------------------------|-----------------------------------|---------------------------------|
| | | |

Light/surge voltage suppressor

| | | DC | AC |
|---|---|----|----------------------|
| — | Without light/surge voltage suppressor | ○ | ○ |
| S | With surge voltage suppressor | ○ | — ^{Note 1)} |
| Z | With light/surge voltage suppressor | ○ | ○ |
| R | With surge voltage suppressor (Non-polar) | ○ | — |
| U | With light/surge voltage suppressor (Non-polar) | ○ | — |

Note 1) There is no S option for AC mode, since a rectifier prevents surge voltage generation.

Note 2) In the DIN terminal type, since a light is installed in the connector, DOZ, DOU, YOZ, YOU are not available.

Caution

When using the surge voltage suppressor type, residual voltage will remain. Refer to back page 7 for details.

Pilot Poppet Type Body Ported/Single Unit **Series VP300/500/700**

Low power consumption 1.5 W (DC)
Possible to use as either a selector or divider valve
Possible to change from N.C. to N.O.

• Refer to back page 8 for changing the type of actuation.

Possible to use in vacuum applications

Up to -100 kPa

Series VP300

Series VP500

Series VP700

External Pilot

Use external pilot type in the following cases:

- For vacuum or for low pressure: 0.2 MPa or less.
- Please consult SMC for use in a vacuum hold application.
- When having P port downsized in diameter
- When using A port as the atmospheric releasing port, e.g. air blower.

Made to Order
(Refer to page 24 for details.)

X500

Pilot exhaust port with piping thread (M3) specification

Specifications

| | | |
|---|----------------------|---|
| Fluid | | Air |
| Type of actuation | | N.C. or N.O. (Convertible) |
| Internal pilot | Standard | 0.2 to 0.7 |
| | High-pressure type | 0.2 to 1.0 |
| External pilot | Standard | -100 kPa to 0.7 |
| | High-pressure type | -100 kPa to 1.0 |
| | Pilot pressure range | Same as operating pressure (Min. 0.2 MPa) |
| Ambient and fluid temperature (°C) | | -10 to 50 (No freezing) |
| Max. operating frequency (Hz) | | 5 |
| Manual override | | Non-locking push type Push-turn locking slotted type Push-turn locking lever type |
| Pilot exhaust type | | Individual exhaust |
| Lubrication | | Not required |
| Mounting orientation | | Unrestricted |
| Impact/Vibration resistance (m/s ²) <small>Note</small> | | 300/50 |
| Enclosure | | Dust-tight (IP65 for D, Y, T) |

Note) Impact resistance: No malfunction occurred when it is tested in the axial direction and at the right angles to the main valve and armature in both energized and de-energized states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Solenoid Specifications

| | | | | |
|--|---------------|---------------------------|--|---|
| Electrical entry | | | Grommet (G), (H) L-type plug connector (L) M-type plug connector (M) | DIN terminal (D) DIN (EN175301-803) terminal (Y) Conduit terminal (T) |
| | | | G, H, L, M | D, Y, T |
| Coil rated voltage (V) | DC | | 24, 12 | |
| | AC (50/60 Hz) | | 100, 110, 200, 220, 240 | |
| Allowable voltage fluctuation | | | ±10% of rated voltage* | |
| Power consumption (W) | DC | Standard | 1.5 (With light: 1.55) | 1.5 (With light: 1.75) |
| | | With power saving circuit | 0.55 (With light only) | 0.75 (With light only) |
| Apparent power (VA) ^{Note 1)} | AC | 100 V | 1.55 (With light: 1.65) | 1.55 (With light: 1.7) |
| | | 110 V | | |
| | | [115 V] | | |
| | | 200 V | | |
| | | 220 V | | |
| | | [230 V] | | |
| 240 V | | | | |
| Surge voltage suppressor | | | Diode (Non-polar type: Varistor) | |
| Indicator light | | | LED (Neon bulb is used for AC mode of D, Y, T.) | |

Note 1) It is in common between 110 VAC and 115 VAC, and between 220 VAC and 230 VAC.

Note 2) Allowable voltage fluctuation is -15% to +5% of the rated voltage for 115 VAC or 230 VAC.

Note 3) Since voltage drops due to the internal circuit in S, Z, T types (with power saving circuit), the allowable voltage fluctuation should be within the following range.

24 VDC: -7% to +10%

12 VDC: -4% to +10%

Response Time

| Model | Pressure specifications | Response time ms (at 0.5 MPa) | | | |
|-------|---------------------------------|--|-------------------------------------|------------|------------|
| | | Without light/surge voltage suppressor | With light/surge voltage suppressor | | AC |

Note 1) Values without bracket

Note 2) These valves have been calculated according to ISO6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

Application Example

(1) Blow-off valve

(2) Pressure release valve

(3) Selector valve

(4) Valve for vacuum

(5) Divider valve

(6) Single-acting cylinder drive

(7) Double-acting cylinder drive

(8) Double-acting cylinder drive (Exhaust centre)

Construction

How to Order Pilot Valve Assembly

⚠ Caution

When only the pilot valve assembly is replaced, it is not possible to change from V211 (Grommet or L/M-type) to V212 (DIN or Conduit type), or vice versa.

Valve model: **VP** - **5** **G** **Z** **1** -

Note) Select from the below in accordance with the valve used.

■ Grommet or L/M-type

V 2 1 1 - **5** **G** **Z**

● Light/surge voltage suppressor

| | | DC | AC |
|---|---|----|------------------------|
| — | Without light/surge voltage suppressor | ○ | ○ |
| S | With surge voltage suppressor | ○ | — <small>Note)</small> |
| Z | With light/surge voltage suppressor | ○ | ○ |
| R | With surge voltage suppressor (Non-polar) | ○ | — |
| U | With light/surge voltage suppressor (Non-polar) | ○ | — |

Note) There is no S option for AC mode, since a rectifier prevents surge voltage generation. When T is selected, only Z type of light/surge voltage suppressor is available.

⚠ Caution

When using the surge voltage suppressor type, residual voltage will remain. Refer to back page 7 for details.

● Electrical entry

| | | |
|-----------|-----------------------------------|-------------------|
| G | Grommet (Lead wire length 300 mm) | |
| H | Grommet (Lead wire length 600 mm) | |
| L | L-type plug connector | With lead wire |
| LN | | Without lead wire |
| LO | | Without connector |
| M | M-type plug connector | With lead wire |
| MN | | Without lead wire |
| MO | | Without connector |

Note 1) LN and MN types are with 2 sockets.

Note 2) Refer to back page 4 when different length of lead wire for L/M-type plug connector is required.

■ DIN or Conduit type

● Pressure specification

| | |
|----------|------------------------------|
| — | Standard (0.7 MPa) |
| K | High-pressure type (1.0 MPa) |

● Coil specification

| | |
|----------|-------------------------------------|
| — | Standard |
| T | With power saving circuit (DC only) |

Note) T type is only available for DC mode.

● Rated voltage

DC

| | |
|----------|--------|
| 5 | 24 VDC |
| 6 | 12 VDC |

AC (50/60 Hz)

| | |
|----------|-------------------|
| 1 | 100 VAC |
| 2 | 200 VAC |
| 3 | 110 VAC [115 VAC] |
| 4 | 220 VAC [230 VAC] |
| 7 | 240 VAC |

⚠ Caution

For V212 (DIN or Conduit type), the coil specification and voltage (including light/surge voltage suppressor) cannot be changed by changing the pilot valve assembly.

⚠ Caution

Tightening torque of the pilot valve assembly mounting screw
M2.5: 0.32 N·m

| 04 | 1/2 | — | — | ○ |

Note) With a gasket and two mounting bolts.

Electrical entry

| Grommet | L-type plug connector | M-type plug connector | DIN terminal | DIN (EN175301-803) terminal | Conduit terminal |
|--|-----------------------------------|-----------------------------------|-----------------------|-----------------------------|---------------------|
| | | | | | |
| G: Lead wire length 300 mm H: Lead wire length 600 mm | L: With lead wire (length 300 mm) | M: With lead wire (length 300 mm) | [IP65 compatible] | [IP65 compatible] | [IP65 compatible] |
| | | | D: With connector | Y: With connector | T: Conduit terminal |
| G: Lead wire length 300 mm H: Lead wire length 600 mm DC Without light/surge voltage suppressor | LN: Without lead wire | MN: Without lead wire | | | |
| | | | DO: Without connector | YO: Without connector | |
| | LO: Without connector | MO: Without connector | | | |

Note 1) LN and MN types are with 2 sockets.

Note 2) Refer to back page 4 when different length of lead wire for L/M-type plug connector is required.

Note 3) Refer to back page 5 for details on the DIN (EN175301-803) terminal.

Note 4) The AC mode of G, H, L and M types are not CE compliant.

Manual override

| —: Non-locking push type | D: Push-turn locking slotted type | E: Push-turn locking lever type |
|--------------------------|-----------------------------------|---------------------------------|
| | | |

Light/surge voltage suppressor

| | | DC | AC |
|---|---|----|----|
| — | Without light/surge voltage suppressor | ○ | ○ |
| S | With surge voltage suppressor | ○ | — |
| Z | With light/surge voltage suppressor | ○ | ○ |
| R | With surge voltage suppressor (Non-polar) | ○ | — |
| U | With light/surge voltage suppressor (Non-polar) | ○ | — |

Note 1) There is no S option for AC mode, since a rectifier prevents surge voltage generation.

Note 2) In the DIN terminal type, since a light is installed in the connector, DOZ, DOU, YOZ, YOU are not available.

Caution

When using the surge voltage suppressor type, residual voltage will remain. Refer to back page 7 for details.

Series VP300/500/700

Low power consumption 1.5 W (DC)
Possible to use as either a selector or divider valve
Possible to change from N.C. to N.O.

• Refer to back page 8 for changing the type of actuation.

Possible to use in vacuum applications

Up to -100 kPa

Series VP300

Series VP500

Series VP700

External Pilot

Use external pilot type in the following cases:

- For vacuum or for low pressure 0.2 MPa or less
- Please consult with SMC for use in a vacuum hold application.
- When having P port downsized in diameter
- When using A port as the atmospheric releasing port, e.g. air blower
- If manifold, external pilot piping can be centralized in manifold base.

Made to Order
(Refer to page 24 for details.)

X500

Pilot exhaust port with piping thread (M3) specification

Specifications

| | | |
|---|----------------------|---|
| Fluid | | Air |
| Type of actuation | | N.C. or N.O. (Convertible) |
| Internal pilot | Standard | 0.2 to 0.7 |
| | High-pressure type | 0.2 to 1.0 |
| External pilot | Standard | -100 kPa to 0.7 |
| | High-pressure type | -100 kPa to 1.0 |
| | Pilot pressure range | Same as operating pressure (Min. 0.2 MPa) |
| Ambient and fluid temperature (°C) | | -10 to 50 (No freezing) |
| Max. operating frequency (Hz) | | 5 |
| Manual override | | Non-locking push type Push-turn locking slotted type Push-turn locking lever type |
| Pilot exhaust type | | Individual exhaust |
| Lubrication | | Not required |
| Mounting orientation | | Unrestricted |
| Impact/Vibration resistance (m/s ²) <small>Note</small> | | 300/50 |
| Enclosure | | Dust-tight (IP65 for D, Y, T) |

Note) Impact resistance: No malfunction occurred when tested in both the axial and right angle directions of main valve and armature (tested in both energized and de-energized states). (Values at the initial period).

Vibration resistance: No malfunction occurred when tested in a one-sweep test between 45 and 2000 Hz, in both the axial and right angle directions of main valve and armature (tested in both energized and de-energized states). (Values at the initial period).

Solenoid Specifications

| | | | |
|--------------------------------------|--|--|--|
| Electrical entry | | Grommet (G), (H) L-type plug connector (L) M-type plug connector (M) G, H, L, M | DIN terminal (D) DIN (EN175301-803) terminal (Y) Conduit terminal (T) D, Y, T |
| Coil rated voltage (V) | DC AC (50/60 Hz) | 24, 12 100, 110, 200, 220, 240 | |
| Allowable voltage fluctuation | | ±10% of rated voltage ^{Notes} | |
| Power consumption (W) | DC <small>With power saving circuit</small> | Standard 1.5 (With light: 1.55) 0.55 (With light only) | 1.5 (With light: 1.75) 0.75 (With light only) |
| Apparent power (VA) ^{Notes} | AC | 100 V | 1.55 (With light: 1.65) 1.55 (With light: 1.7) |
| | | 110 V | |
| | | [115 V] | |
| | | 200 V | |
| | | 220 V | |
| | | [230 V] | |
| | 240 V | | |
| Surge voltage suppressor | | Diode (Non-polar type: Varistor) | |
| Indicator light | | LED (Neon bulb is used for AC mode of D, Y, T.) | |

Note 1) It is in common between 110 VAC and 115 VAC, and between 220 VAC and 230 VAC.

Note 2) Allowable voltage fluctuation is -15% to +5% of the rated voltage for 115 VAC or 230 VAC.

Note 3) Since voltage drops due to the internal circuit in S, Z, T types (with power saving circuit), the allowable voltage fluctuation should be within the following range.

24 VDC: -7% to +10%

12 VDC: -4% to +10%

Response Time

| Model | Pressure specifications | Response time ms (at 0.5 MPa) | | | |

Note) Only DIN and conduit terminal types are available for AC mode. Refer to the electrical entry for details.

How to Order Valve (With a gasket and two mounting bolts)

VP **3** **4** **4** **-** **5** **G** **1** **-** **A** **-**

Series

| | |
|----------|-------|
| 3 | VP300 |
| 5 | VP500 |
| 7 | VP700 |

Pilot type

| | |
|----------|----------------|
| - | Internal pilot |
| R | External pilot |

Pressure specification

| | |
|----------|------------------------------|
| - | Standard (0.7 MPa) |
| K | High-pressure type (1.0 MPa) |

Coil specification

| | |
|----------|-------------------------------------|
| - | Standard |
| T | With power saving circuit (DC only) |

Note 1) Be sure to select the power saving circuit type when it is continuously energized for a long time. (Refer to back page 7 for details.)

Note 2) T type is only available for DC mode. When T is selected, only Z type of light/surge voltage suppressor is available. (Note that when the electrical entry of DIN terminal type without connector is selected, only DOS and YOS are available.)

Rated voltage

DC

| | |
|----------|--------|
| 5 | 24 VDC |
| 6 | 12 VDC |

AC (50/60 Hz)

| | |
|----------|-------------------|
| 1 | 100 VAC |
| 2 | 200 VAC |
| 3 | 110 VAC [115 VAC] |
| 4 | 220 VAC [230 VAC] |
| 7 | 240 VAC |

Note) Only DIN and conduit terminal types can be set for AC mode. Refer to the electrical entry for details.

Type of actuation

| | |
|----------|------------------------|
| A | N.C. (Normally closed) |
| B | N.O. (Normally open) |

Manual override

| - : Non-locking push type | D : Push-turn locking slotted type | E : Push-turn locking lever type |
|----------------------------------|---|---|
| | | |

Light/surge voltage suppressor

| | | DC | AC |
|----------|---|-----------------------|--|
| - | Without light/surge voltage suppressor | <input type="radio"/> | <input type="radio"/> |
| S | With surge voltage suppressor | <input type="radio"/> | <input type="radio"/> <small>Note 1)</small> |
| Z | With light/surge voltage suppressor | <input type="radio"/> | <input type="radio"/> |
| R | With surge voltage suppressor (Non-polar) | <input type="radio"/> | <input type="radio"/> |
| U | With light/surge voltage suppressor (Non-polar) | <input type="radio"/> | <input type="radio"/> |

Note 1) There is no S option for AC mode, since a rectifier prevents surge voltage generation.

Note 2) In the DIN terminal type, since a light is installed in the connector, DOZ, DOU, YOZ, YOU are not available.

Caution

When using the surge voltage suppressor type, residual voltage will remain. Refer to back page 7 for details.

Made to Order

| | |
|-------------|--|
| - | - |
| X500 | Pilot exhaust port with piping thread (M3) specification (Refer to page 24). |

Electrical entry

| Grommet | L-type plug connector | M-type plug connector | DIN terminal | DIN (EN175301-803) terminal | Conduit terminal |
|--|---|---|-------------------------------|-------------------------------|-----------------------------|
| | | | | | |
| G : Lead wire length 300 mm H : Lead wire length 600 mm | L : With lead wire (length 300 mm) | M : With lead wire (length 300 mm) | D : With connector | Y : With connector | T : Conduit terminal |
| | LN : Without lead wire | MN : Without lead wire | | | |
| G : Lead wire length 300 mm H : Lead wire length 600 mm DC Without light/surge voltage suppressor | LO : Without connector | MO : Without connector | DO : Without connector | YO : Without connector | |

Note 1) LN and MN types are with 2 sockets.

Note 2) Refer to back page 4 when different length of lead wire for L/M-type plug connector is required.

Note 3) Refer to back page 5 for details on the DIN (EN175301-803) terminal.

Note 4) The AC mode of G, H, L and M types are not CE compliant.

Series VP300/500/700

Piping is concentrated on the base side.

All external pilots are gathered in the base.

Common external pilot port allows one piping.

2 types of exhaust ports

Common or individual exhaust type are available. For individual exhaust type, exhaust can be restricted.

Easy to change between N.C. and N.O.

Type of actuation can be easily changed from normally closed to normally open by only changing the direction of a valve and end-plate 180°.

- Refer to back page 8 for changing the type of actuation.

VV3P3-41-051-02

VV3P5-42-053-03

Manifold Specifications

| Series | Base model | Piping specifications | | | Applicable valve | Applicable stations ^{Note)} | Manifold base Mass: W [g] Stations: n |
|--------|------------|-----------------------|--------------------|-----------|------------------|--------------------------------------|--|
| | | 1P (SUP) port type | 3R (EXH) port type | Port size | | | |
| VP300 | VV3P3-41 | Common | Common | 1/4 | VP344 | 2 to 20 stations | W = 110n + 90 |
| | VV3P3-42 | | Individual | | | | |
| VP500 | VV3P5-41 | | Common | 3/8 | VP544 | 2 to 20 stations | W = 190n + 150 |
| | VV3P5-42 | | Individual | | | | |
| VP700 | VV3P7-41 | | Common | 1/2 | VP744 | 2 to 20 stations | W = 410n + 380 |
| | VV3P7-42 | | Individual | | | | |

Note) Supply pressure to 1(P) ports and exhaust pressure from 3(R) ports on both sides for 10 stations or more.

Manifold Option

| Description | Part no. | Applicable manifold base model |
|---|-------------|--------------------------------|
| Blanking plate assembly (With a gasket and two mounting bolts) | VP300-25-1A | VV3P3 |
| | VP500-25-1A | VV3P5 |
| | VP700-25-1A | VV3P7 |

How to Order Manifold Assembly (Example)

Ordering example (VV3P3-41)

VV3P3-41-051-02 1 set (Type 41, 5-station manifold base part no.)
 * VP300-25-1A 1 set (Blanking plate assembly part no.)
 * VP344-5GZ1-A 2 sets (N.C. type part no.)
 * VP344-5GZ1-B 2 sets (N.O. type part no.)

→ The asterisk denotes the symbol for assembly.
 Prefix it to the part nos. of the solenoid valve, etc.

• Indicate the valves to be attached below the manifold part number, in order starting from station 1 as shown in the drawing.

1 Pilot Exhaust Port with Piping Thread (M3) Specification

In this specification, piping to the pilot exhaust port (PE port) is available when the valve is used in an environment where the exhaust from the pilot valve is not allowable, or intrusion of ambient dust should be prevented.

How to Order Valve (With a gasket and two mounting bolts)

Manifold Specifications

| Series | Base model | Piping specifications | | | Applicable valve | Applicable stations <small>Note)</small> | Manifold base Mass: W [g] Stations: n |
|--------|------------|-----------------------|-----------------------|-----------|------------------|--|---|
| | | 1P (SUP) port type | 3R (EXH) port type | Port size | | | |
| VPA300 | VV3PA3-41 | Common | Common | 1/4 | VPA344 | 2 to 20 stations | W = 110n + 90 |
| | VV3PA3-42 | | Individual | | | | |
| VPA500 | VV3PA5-41 | | Common | 3/8 | VPA544 | 2 to 20 stations | W = 190n + 150 |
| | VV3PA5-42 | | Individual | | | | |
| VPA700 | VV3PA7-41 | | Common | 1/2 | VPA744 | 2 to 20 stations | W = 410n + 380 |
| | VV3PA7-42 | | Individual | | | | |

Note) Supply pressure to 1(P) ports and exhaust air from 3(R) ports on both sides for 10 stations or more.

• Refer to back page 8 for changing the type of actuation.

How to Order Manifold Assembly (Example)

Ordering example (VV3PA3-41)

VV3PA3-41-051-02 1 set (Type 41, 5-station manifold base part no.)
 * VP300-25-1A 1 set (Blanking plate assembly part no.)
 * VPA344-1-A 2 sets (N.C. type part no.)
 * VPA344-1-B 2 sets (N.O. type part no.)

→ The asterisk denotes the symbol for assembly.
 Prefix it to the part nos. of the valve, etc.

• Indicate the valves to be attached below the manifold part number, in order starting from station 1 as shown in the drawing.

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC) ^{Note 1)} and other safety regulations.

Note 1) ISO 4414: Pneumatic fluid power – General rules relating to systems.
ISO 4413: Hydraulic fluid power – General rules relating to systems.
IEC 60204-1: Safety of machinery – Electrical equipment of machines. (Part 1: General requirements)
ISO 10218: Manipulating industrial robots -Safety.
etc.

 **Caution:** Operator error could result in injury or equipment damage.

 **Warning:** Operator error could result in serious injury or loss of life.

 **Danger :** In extreme conditions, there is a possibility of serious injury or loss of life.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.

2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.

3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.

2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.

3. An application which could have negative effects on people, property, or animals requiring special safety analysis.

4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

Safety Instructions

Caution

The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary. If anything is unclear, contact your nearest sales branch.

Limited Warranty and Disclaimer/Compliance Requirements

The product used is subject to the following “Limited Warranty and Disclaimer” and “Compliance Requirements”. Read and accept them before using the product.

Limited Warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered.^{Note 2)}

Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.

2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.

This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.

3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.

Note 2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

When the product is exported, strictly follow the laws required by the Ministry of Economy, Trade and Industry (Foreign Exchange and Foreign Trade Control Law).

Series VP Specific Product Precautions 1

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Manual Override

⚠ Warning

When no electric signal is applied to the solenoid valve. The manual override is used for switching the main valve. Connected actuator is started by manual operation. Use the manual override after confirming that there is no danger.

■ Non-locking push type

Push down on the manual override button with a small screwdriver until it stops. Release the screwdriver and the manual override will return.

■ Push-turn locking slotted type

Locked condition

Push the manual override button with a small flat head screwdriver until it stops. Turn it in the clockwise direction 90° to lock the manual. Turn it counterclockwise to release it.

■ Push-turn locking lever type

Locked condition

After pushing down, turn in the direction of the arrow. If it is not turned, it can be operated the same way as the non-locking type.

⚠ Caution

When locking the manual override with the push-turn locking type (D or E type), be sure to push it down before turning. Turning without first pushing it down can cause damage to the manual override and other troubles such as air leakage, etc. Do not apply excessive torque when turning the locking type manual override. (0.1 N·m)

How to Use L/M-Type Plug Connector

⚠ Caution

1. Attaching and detaching connectors

- To attach a connector, hold the lever and connector unit between your fingers and insert straight onto the pins of the solenoid valve so that the lever's pawl is pushed into the groove and locks.
- To detach a connector, remove the pawl from the groove by pushing the lever downward with your thumb, and pull the connector straight out.

2. Crimping lead wires and sockets

Strip 3.2 to 3.7 mm at the end of the lead wires, insert the ends of the core wires evenly into the sockets, and then crimp with a crimping tool. When this is done, take care that the coverings of the lead wires do not enter the core wire crimping area. (Please contact SMC for details on the crimping tool.)

Note) It is not necessary to crimp lead wires and socket if ordering the lead wire pre-connected model.

3. Attaching and detaching sockets with lead wire

• Attaching

Insert the sockets into the square holes of the connector (⊕, ⊖ indication), and continue to push the sockets all the way in until they lock by hooking into the seats in the connector. (When they are pushed in, their hooks open and they are locked automatically.) Then, confirm that they are locked by pulling lightly on the lead wires.

• Detaching

To detach a socket from a connector, pull out the lead wire while pressing the socket's hook with a stick having a thin tip (approx. 1 mm). If the socket will be used again, first spread the hook outward.

Series VP

Specific Product Precautions 2

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Plug Connector Lead Wire Length

⚠ Caution

Plug connector lead wires have a standard length of 300 mm, however, the following lengths are also available.

How to Order Connector Assembly

| | | |
|--------------------|---------------|--|
| DC | : V200-30-4A- | |
| 100 VAC | : V200-30-1A- | |
| 200 VAC | : V200-30-2A- | |
| AC other voltages: | V200-30-3A- | |

Without lead wire : V200-30-A
(With connector and 2 pcs. of socket)

● Lead wire length

| | |
|-----|---------|
| Nil | 300 mm |
| 6 | 600 mm |
| 10 | 1000 mm |
| 15 | 1500 mm |
| 20 | 2000 mm |
| 25 | 2500 mm |
| 30 | 3000 mm |
| 50 | 5000 mm |

How to Order

Include the connector assembly part number together with the part number for the plug connector's solenoid valve without connector.

(Example) 2000 mm lead wire length:

| DC | AC |
|----------------|----------------|
| VP342-5LO1-01A | VP342-1LO1-01A |
| V200-30-4A-20 | V200-30-1A-20 |

How to Use DIN Terminal

The DIN terminal type with an IP65 enclosure is protected against dust and water, however, it must not be used in water.

⚠ Caution

Connection

- 1) Loosen the set screw and pull the connector out of the solenoid valve terminal block.
- 2) After removing the set screw, insert a flat head screwdriver into the notch on the bottom of the terminal block and pry it open, separating the terminal block and the housing.
- 3) Loosen the terminal screws on the terminal block, insert the core of the lead wire into the terminal, and attach securely with the terminal screws.
In addition, when using the DC mode type with a surge voltage suppressor (polar: S and Z types), connect wires corresponding to the polarity (+ or -) that is printed on the terminal block.
- 4) Tighten the ground nut to secure the wire.
In the case of connecting wires, select cable cords carefully because if those out of the specified range ($\phi 4.5$ to $\phi 7$) are used, it will not be able to satisfy IP65 (enclosure).
Tighten the ground nut and set screw within the specified range of torque.

Changing the entry direction

After separating terminal block and housing, the cord entry direction can be changed by attaching the housing in the opposite direction.

Note) Make sure not to damage elements, etc., with the lead wires of the cord.

Precautions

Plug in and pull out the connector vertically without tilting to one side.

Applicable cable

Cable O.D.: $\phi 4.5$ to $\phi 7$.

(Reference) 0.5 mm^2 to 1.5 mm^2 , 2-core or 3-core, equivalent to JIS C 3306.

Applicable crimped terminal

O terminal: R1.25-4M that is specified in JIS C 2805.

Y terminal: 1.25-3L, which is released by JST Mfg. Co., Ltd.

Stick terminal: size 1.5 or shorter.

Series VP

Specific Product Precautions 3

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

DIN (EN175301-803) Terminal

Y type DIN terminal corresponds to the DIN connector with terminal pitch 10 mm, which complies with EN175301-803B. Since the terminal pitch is different from the D type DIN connector, these two types are not interchangeable.

How to Order DIN Connector

⚠ Caution

● Without indicator light:

DC, AC, Other voltages: V200-□-1

● With indicator light:

DC

Polar type (□Z) : V200-□-3-□

Non-polar type (□U) : V200-□-5-□

● Rated voltage

DC (□U) circuit

AC (□Z) circuit

LED: Light emitting diode, R: Resistor NL: Neon bulb, R: Resistor

DC (□Z) circuit

LED: Light emitting diode
D: Protective diode
R: Resistor

How to Use Conduit Terminal

⚠ Caution

Connection

1) Loosen the set screw and remove the terminal block cover from the terminal block.

2) Loosen the terminal screws on the terminal block, insert the core of the lead wire or crimped terminal into the terminal, and attach securely with the terminal screws.

In addition, when using the DC mode type with a surge voltage suppressor (polar: S and Z types), connect wires to terminal 1 and 2 corresponding to the polarity (+ or -) as shown on the figure on the right.

3) Secure the cord by fastening the ground nut.

In case of connecting wires, select cable cords carefully because if those out of the specified range (ø4.5 to ø7) are used, it will not be able to satisfy IP65 (enclosure).

Tighten the ground nut and set screw within the specified range of torque.

Applicable cable

Cable O.D.: ø4.5 to ø7.

(Reference) 0.5 mm² to 1.5 mm², 2-core or 3-core, equivalent to JIS C 3306.

Applicable crimped terminal

O terminal: Equivalent to R1.25-3 that is specified in JIS C 2805.

Y terminal: Equivalent to 1.25-3, which is released by JST Mfg. Co., Ltd.

Note) Use O terminal when a ground terminal is used.

Series VP

Specific Product Precautions 4

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Leakage Voltage

⚠ Caution

Especially when a resistor and a switching element are used in parallel or C-R device (surge voltage suppressor) is used for the protection of the switching device, note that leakage voltage will be increased by passing leakage voltage through the resistor and C-R device. Therefore, suppressor residual leakage voltage should be as follows.

DC coil

3% or less of the rated voltage

AC coil

8% or less of the rated voltage

Continuous Duty

⚠ Caution

- If a valve is continuously energized for long periods of time, the rise in temperature due to heat-up of the coil assembly may cause a decline in solenoid valve performance, reduce service life, or have adverse effects on peripheral equipment. If the valve is continuously energized for a long time, or the total energizing time per day becomes longer than the non-energizing time, use a valve with power saving circuit. Also, it is possible to reduce the energizing time by using a N.O. (normally open) valve.
- When the valve is mounted onto a control panel, take measures against radiation in order to keep the valve temperature within the specified range.

Light/Surge Voltage Suppressor

⚠ Caution

<DC>

■ Polar type

With surge voltage suppressor (□S)

● Grommet or L/M-type plug connector

With light/surge voltage suppressor (□Z)

● DIN or Conduit terminal

With light/surge voltage suppressor (□Z)

■ Non-polar type

With surge voltage suppressor (□R)

● Grommet or L/M-type plug connector

With light/surge voltage suppressor (□U)

● DIN or Conduit terminal

With light/surge voltage suppressor (□U)

- Please connect correctly the lead wires to + (positive) and - (negative) indications on the connector. (For non-polar type, the lead wires can be connected to either one.)
- When the valve with mis-wiring protection diode is used, the voltage will drop by approx. 1 V. Therefore, pay attention to the allowable voltage fluctuation (For details, refer to the solenoid specification of each type of valve).
- Solenoids, whose lead wires have been pre-wired: + (positive) side red and - (negative) side black.

Series VP

Specific Product Precautions 5

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Light/Surge Voltage Suppressor

■ With power saving circuit

Power consumption is decreased by approx. 1/3 by reducing the wattage required to hold the valve in an energized state. (Effective energizing time is over 40 ms at 24 VDC.)

Refer to the electrical power waveform as shown below.

<Electrical power waveform of energy saving type>

- Since the voltage will drop by approx. 0.5 V due to the transistor, pay attention to the allowable voltage fluctuation. (For details, refer to the solenoid specifications of each type of valve.)

<AC>

There is no S option, since a rectifier prevents surge voltage generation.

- Grommet or L/M-type plug connector

With light/surge voltage suppressor (□Z)

- DIN or Conduit terminal

With light/surge voltage suppressor (□Z)

⚠ Caution

Residual voltage of the surge voltage suppressor

Note) if a varistor or diode surge voltage suppressor is used, there is some residual voltage to the protection element and rated voltage. Therefore, refer to the table below and pay attention to the surge voltage protection on the controller side. Also, since the response time does change, refer to the specifications on page 2 and 9.

Residual Voltage

| Surge voltage suppressor | DC | | AC |
|--------------------------|--------------|--------------|-------------|
| | 24 | 12 | |
| S, Z | Approx. 1 V | | Approx. 1 V |
| R, U | Approx. 47 V | Approx. 32 V | — |

Countermeasure for Surge Voltage Intrusion

⚠ Caution

With non-polar type solenoid valves, at times of sudden interruption of the loading power supply, such as emergency shutdown, surge voltage intrusion may be generated from loading equipment with a large capacity (power consumption), and the solenoid valve in a de-energized state may switch over (see Figure 1).

When installing a breaker circuit for the loading power supply, consider using a solenoid valve with polarity (with polarity protection diode), or install a surge absorption diode between the loading equipment COM line and the output equipment COM line (see Figure 2).

Figure 1. Surge intrusion circuit example (NPN outlet example) (24 VDC)

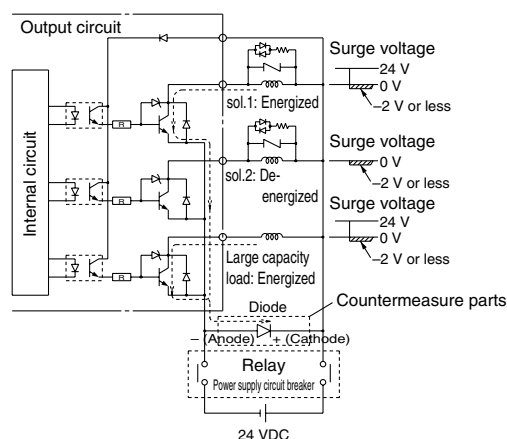

Figure 2. Surge intrusion circuit example (NPN outlet example) (24 VDC)

Series VP

Specific Product Precautions 6

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, “Handling Precautions for SMC Products” (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Type of Actuation Changing

Warning

When changing the actuation or restarting the valve after the change, make sure that safety is fully assured.

Example: Changing from N.C. to N.O.

1) Base mounted

1. Remove the body from the sub-plate and reset the “▼” mark on the body corresponding to the “N.O.” mark on the sub-plate as shown in the figure above.
2. Remove the end plate from the body and rotate the end plate by 180° so that the “N.O.” mark on the end plate is at the top of the valve.

Note) It is not necessary to change the piping when this is done.

2) Body ported

- Remove the end plate from the body and rotate the end plate by 180° to correspond the “N.O.” mark on the end plate to the top of the valve.

Note) Piping should be arranged as follows.

| Type of actuation \ Port | 1P | 2A | 3R |
|--------------------------|--------------|-------------|--------------|
| N.C. | Inlet side | Outlet side | Exhaust side |
| N.O. | Exhaust side | Outlet side | Inlet side |

One-touch Fittings

Caution

When fittings are used, they may interfere with others depending on their types and sizes. Therefore, the dimensions of the fittings to be used should first be confirmed in their respective catalogues.

Fittings compliant with the VP series are stated below. If the fitting within the applicable range is selected, there will not be any interference.

Applicable Fittings: Series KQ2H, KQ2S

| Series | Piping port | Port size | Applicable tubing O.D. | | | | | | |

*О переключении с Н.З. на Н.О см. далее

Исполнения с внешним пилотным управлением и для вакуума/низкого давления поставляются по запросу

Запасные части

| Наименование | Напряжение | Номер для заказа |
|--|------------|------------------|
| Запасной элемент включения с катушкой электромагнита | 24 V DC | VT3113-005D |
| | 220 V AC | VT3113-004D |

Переключение с Н.З. на Н.О.

Для переключения с Н.З. на Н.О. в составе распределителя имеется специальная коммутирующая пластина, положение которой определяет тип распределителя. Для переключения необходимо, отсоединив пилотный клапан, повернуть коммутирующую пластину вместе с верхним и нижним уплотнениями так, чтобы соответствующее буквенное обозначение на пластине совпало с меткой на корпусе распределителя см. рис. 1. Подключение портов см. табл. 1.

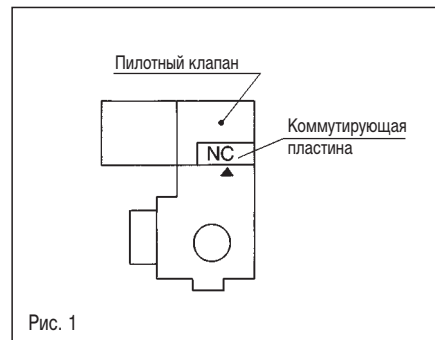

Н.О. распределитель будет функционировать правильно, если к нему подано достаточное давление.

Убедитесь, что распределитель во время переключения не находится под давлением.

Подключение

Табл. 1

| Тип | Условное обозначение | Подключение | | |
|--------------------|----------------------|------------------------|---------------|--------|
| | | Порт Р | Порт А | Порт R |
| Нормально закрытый | | Подвод сжатого воздуха | К потребителю | Выхлоп |
| Нормально открытый | | Подвод сжатого воздуха | К потребителю | Выхлоп |

Specifications

| | |
|--|---|
| Valve configuration | External pilot 3 port solenoid valve |
| Type of actuation | Double solenoid (-X80), Single solenoid (-X81) |
| Fluid | Air |
| Operating pressure range | -101.2 kPa to 0.8 MPa |
| Pilot pressure | 85 to 115% of main pressure, Min. 0.2 MPa |
| Ambient and fluid temperature | 0 to 50°C (No freezing) |
| Lubrication ⁽¹⁾ | Required (Equivalent to turbine oil Class 1 ISO VG32) |
| Mounting orientation | Unrestricted |
| Impact/Vibration resistance ⁽²⁾ | 150/50 m/s ² |

Note 1) This solenoid valve requires lubrication. Use turbine oil Class 1 (ISO VG32).

Note 2) Impact resistance: No malfunction occurred when it is tested with a drop tester in the axial direction and at the right angles to the main valve and armature in both energized and de-energized states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 1000 Hz. Test was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Solenoid Specifications

| | | |
|--|---|----------------------------|
| Electrical entry | Grommet, Grommet terminal, Conduit terminal DIN terminal, L plug connector, M plug connector | |
| Coil rated voltage (V) | AC (50/60 Hz) | 100, 200, 110*, 220*, 240* |
| | DC | 24, 12* |
| Allowable voltage fluctuation | -15 to 10% | |
| Apparent power (AC) ^{Note} | Inrush | 5.6 VA/50 Hz, 5.0 VA/60 Hz |
| | Holding | 3.4 VA/50 Hz, 2.3 VA/60 Hz |
| Power consumption (DC) ^{Note} | W/o indicator light | 1.8W |
| | W/ indicator light | 2W |

* Option

Note) At rated voltage

Caution

Piping and other usage are the same as standard products.

Dimensions

VP3145-□□DZA1-X81

- When B spec. of -X81 (N.O. spec.), VF3140 solenoid has to be positioned at left, when looking at the EXH port in the front face.
- In the case of -X80, VF3240-□□□ (Pilot valve) will be mounted.

Large Size 3 Port Solenoid Valve **Series VP3145/3165/3185**

Specific Product Precautions

Be sure to read before handling.

Refer to front matters 58 and 59 for Safety Instructions and pages 3 to 7 for 3/4/5 Port Solenoid Valve Precautions.

⚠ Caution

Piping

If supply port air pressure drops to less than 0.2 MPa, the valve may malfunction. In such a case, use external pilot type. (When throttling IN port, or operating with OUT port open to the atmosphere or in a similar operation.)

Pressure balance among each port

This solenoid valve is pressure-unbalanced type. Operate it within this pressure range: $IN \geq OUT \geq EXH$. If not operated in the range, the valve will malfunction.

Use as 2 port valve

1. Plug EXH port in case of pressure-in and plug IN port in case of vacuum use.
2. This valve has slight air leakage and can not be used for such purposes as holding air pressure (including vacuum) in the pressure container.

Supply air

Install an air filter and a lubricator on the upstream side.

Lubrication

This solenoid valve requires lubrication. Use turbine oil Class 1 (ISO VG32). Besides that, for brands of each manufacturer, refer to page 6.

Environment

If using the valve in a dusty environment, install a silencer at EXH port and PE port to prevent dust from entering.

N.C./N.O. conversion

When changing the direction of a switching plate to convert from N.C. to N.O. and vice versa, note that the equipment to be connected will act reversely.

How to Calculate the Flow Rate

For obtaining the flow rate, refer to front matters 44 to 47.

Light/Surge Voltage Suppressor

| | Grommet (G) | Conduit terminal (T) | DIN terminal (D) | |
|---|-------------|-----------------------|-----------------------------------|--|
| With indicator light (L) | None | Neon bulb | 48 VDC or less LED | 100 VAC or more Neon bulb |
| Surge voltage suppressor (S) | | Varistor | | |
| With light/surge voltage suppressor (Z) | None | Neon bulb Varistor | 48 VDC or less LED Varistor | 100 VAC or more Neon bulb Varistor |

⦿ "Items that are marked "With indicator light," "With surge voltage suppressors," and "With light/surge voltage suppressor" are all non-polar types.

How to Use DIN Terminal

1. Disassembly

- 1) After loosening the screw (1), then if the housing (4) is pulled in the direction of the screw, the connector will be removed from the body of equipment (solenoid, etc.).
- 2) Pull out the screw (1), then remove the gasket (2a) or (2b).
- 3) On the bottom part of the terminal block (3), there's a cut-off part (indication of an arrow) (3a). If a small flat head screwdriver is inserted between the opening in the bottom, terminal block (3) will be removed from the cover (4). (Refer to the figure below.)
- 4) Remove the cable gland (5) and plain washer (6) and rubber seal (7).

2. Wiring

- 1) Pass them through the cable (8) in the order of cable ground (5), washer (6), rubber seal (7), and then insert into the housing (4).
- 2) Dimensions of the cable (8) are the figure as below. Skin the cable and crimp the crimped terminal (9) to the edges.
- 3) Remove the screw with washer (3e) from the bracket (3e). (Loosen in the case of Y-shape type terminal.) As shown in the below figure, mount a crimped terminal (9), and then again tighten the screw (3e).

Note) Tighten within the tightening torque of $0.5 \text{ N}\cdot\text{m} \pm 15\%$.

Note: a It is possible to wire even in the state of bare wire. In that case, loosen the screw with washer (3e) and place a lead wire (3d) into the bracket, and then tighten it once again.

b Maximum size of crimped terminal (9) is up to 1.25 mm^2 —3.5 when O terminal. For Y terminal, it is up to 1.25 mm^2 —4.

c Cable (8) external: 6 to 12 mm ϕ

Note) For the one with the external dimension ranged between 9 to 12 mm ϕ , remove the inside parts of the rubber seal (7) before using.

3. Assembly

- 1) Terminal block (3) connected with housing (4) should be reinstated. (Push it down until you hear the click sound.)
- 2) Putting rubber seal (7), plain washer (6), in this order into the cable introducing slit on the housing (4), then further tighten the cable gland (5) securely.
- 3) By inserting gasket (2a) or (2b) between the bottom part of the terminal block (3) and a plug on an equipment, screw in (1) on top of the housing (4) and tighten it.

Note) Tighten within the tightening torque of $0.5 \text{ N}\cdot\text{m} \pm 20\%$.

Note: The orientation of a connector can be changed arbitrarily, depending on the combination of a housing (4) and a terminal block (3).

| Coil rated voltage [V] | DC | | 24, 12 | |
| | AC (50/60 Hz) | | 100, 110, 200, 220 | |
| Allowable voltage fluctuation | | | ±10% of rated voltage*2 | |
| Power consumption [W] | DC | Standard | 0.35 (With light: 0.45) | |
| Apparent power [VA]*1 | AC | 100 V | 0.78 (With light: 0.87) | |
| | | 110 V [115 V] | 0.86 (With light: 0.97) [0.94 (With light: 1.07)] | |
| | | 200 V | 1.15 (With light: 1.30) | |
| | | 220 V [230 V] | 1.27 (With light: 1.46) [1.39 (With light: 1.60)] | |
| Surge voltage suppressor | | | Varistor (DC) | |
| Indicator light | | | LED (DC), Neon bulb (AC) | |

*1 The 110 VAC and 115 VAC are interchangeable. The 220 VAC and 230 VAC are interchangeable as well.

*2 The allowable voltage fluctuation is -15% to +5% of the rated voltage for the 115 VAC or 230 VAC.

Response Time/Weight

| Model | Pressure specifications | Response time [ms](at 0.5 MPa) | | | Weight [g] |
|--------|-------------------------------------|--|-------------------------------------|----|----------------------------|
| | | Without light/surge voltage suppressor | With light/surge voltage suppressor | AC | |
| VP517Y | Standard (0.2 to 0.7 MPa) | 27 | 32 | 44 | 222 (With bracket: 257) |
| | High-pressure type (0.2 to 1.0 MPa) | 41 | 48 | 44 | |
| VP717Y | Standard (0.2 to 0.7 MPa) | 41 | 48 | 50 | 413 (With bracket: 468) |
| | High-pressure type (0.2 to 1.0 MPa) | 67 | 76 | 50 | |

Flow Rate Characteristics

| Model | Port size EXH. | Flow rate characteristics | | | | | |
|--------|----------------|------------------------------|------|-----|------------------------------|------|-----|
| | | 1→2 (P→A) | | | 2→3 (A→R) | | |
| | | C [dm ³ /(s·bar)] | b | Cv | C [dm ³ /(s·bar)] | b | Cv |
| VP517Y | G3/8 | 8.8 | 0.14 | 2 | 8.2 | 0.15 | 1.8 |
| VP717Y | G1/2 | 13.8 | 0.11 | 2.9 | 12.9 | 0.18 | 2.9 |

VP500/700 Series

Spacer

| Model | A | B | C | D |
|--------|-----|------|------|------|
| Y300-A | 4.2 | 43.4 | 21.7 | 57.9 |
| Y400-A | 5.2 | 53 | 26.5 | 68.5 |

Spacer with Bracket

| Model | A | B | C | D | E | F | G | H | J | K |
|---------|-----|----|----|------|----|----|---|----|---|----|
| Y300T-A | 4.2 | 82 | 41 | 71.5 | 35 | 14 | 7 | 19 | 4 | 41 |
| Y400T-A | 5.2 | 96 | 48 | 86.1 | 40 | 18 | 9 | 26 | 5 | 50 |

Piping Adapter: 3/8, 1/2

A piping adapter allows installation/removal of the component without removing the piping and thus makes maintenance easier.

| Model *1 | Port size | A | B | D |
|------------|-----------|------|----|----|
| E300-□03-A | 3/8 | 31.8 | 30 | 30 |
| E400-□04-A | 1/2 | 31.8 | 36 | 36 |

*1 □ in model numbers indicates a pipe thread type. No indication is necessary for Rc; however, indicate N for NPT, and F for G.
* Separate spacers are required for modular units.

Silencer

Compact resin type

| Dimensions [mm] | | | |
|-----------------|-------------|------|----|
| Model | Port size R | A | B |
| AN30-03 | 3/8 | 58.5 | 20 |
| AN40-04 | 1/2 | 68 | 24 |

High noise reduction type

| Model | Port size R | Dimensions [mm] | |
|----------|-------------|-----------------|----|
| | | A | B |
| AN302-03 | 3/8 | 84 | 28 |
| AN402-04 | 1/2 | 95 | 34 |
